

# Genuine parts of Furukawa Rock Drill

Boost your Productivity with the Best Choice

Furukawa Rock Drill genuine rods (chisel) are designed and manufactured with ideal compatibility with core parts (pistons, bushings, etc.) in consideration of individual product characteristics.

None-genuine rods (not manufactured according to original design) may cause serious damage on the core parts having a impact, even if the rod's life may be extended a little. Genuine parts pursue a balance between strength and durability maximize the performance of the product and improve the cost performance over the life cycle of the product.

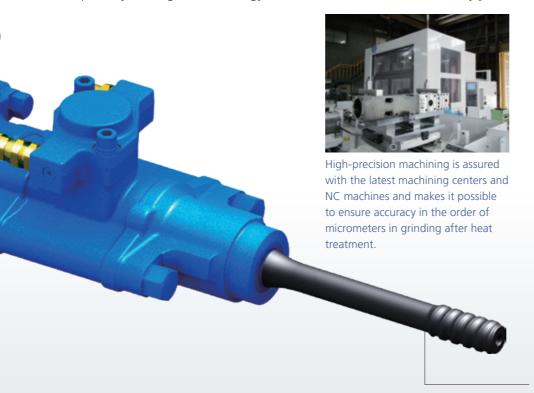

The use of genuine parts is the only way to get high performance of the products.

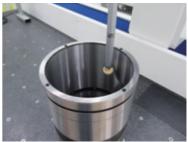

### High quality achieved from the experience for over 100 years

Furukawa Rock Drill strictly controls all processes from material procurement to final inspection.

We apply particularly high level of quality control to each of the machining, welding, heat treatment and grinding processes that are important for rock drills. Above all, the hardness and strength of steel, which affects the durability of rock drills, are pursued ideally by the latest heat treatment.

We pride ourselves on consistent product manufacturing, from material research to design, manufacturing, assembly, inspection, and after-sales service. Furukawa Rock Drill will continue to provide well-balanced and durable parts by utilizing the technology and know-how cultivated over many years.

We also measure geometric dimensions (roundness, flatness, etc.) that cannot be measured by human eyes with a three-dimensional measuring device.

### Hydraulic breaker

Less noisy and environmentally friendly, A model to be installed in the ultra-low noise SS-BOX.

### Hydraulic drifter

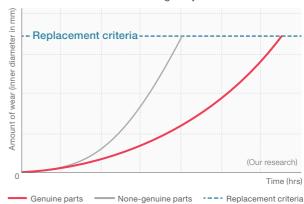

With a dual damper mechanism and a wedge-shaped piston that maximizes energy transfer efficiency, it quickly responds to various changes in rock condition.

### Hydraulic drifter front bushing

Special materials and shapes suitable for rock drills reduce wear on the sliding surface of the rod and provide optimum life of front bush and rod.

#### Life of front bushing of hydraulic drifter

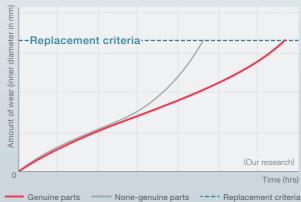

Result of comparing life between genuine parts and none-genuine parts. Cases (Fig.1) have been reported that internal parts were seriously damaged by the use of none-genuine parts. The use of genuine parts brings the optimum machine life.

### Hydraulic breaker rod

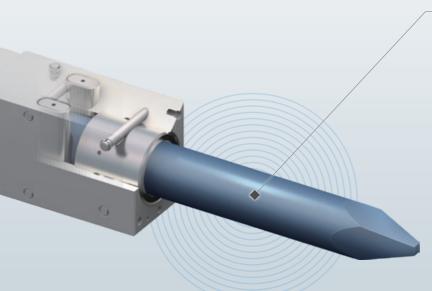

Achieves the optimum balance of strength and toughness by delicate hardness adjustment by heat treatment at our own factory.

#### Life of hydraulic breaker rod

Result of comparing the rod life between genuine parts and none-genuine parts. Cases of serious damage to the piston (Fig.2) have been reported because the surface of none-genuine parts were too hard. The use of genuine parts brings the optimum machine life.

#### Convenient and affordable purchasing service

### Consumables kit sale

Among the genuine service parts indispensable for improving the life of the product, consumable kits that include parts in high demand are available. Also we have set a better price for the kit parts than purchasing them separately.

#### Hydraulic breaker consumable kit

Front kit Breaker seal kit and kit parts around the front Front kit light Breaker seal kit, rod pin, stop pin kit parts

#### Blast hole drill filter kit

Filter kit (HCR) Filter kit parts to be replaced frequently (Crawler drill)

Filter kit (DCR) Filter kit parts to be replaced frequently (Down the hole drill)

#### **Hydraulic Drifter Consumable parts Kit**

2000Hrs kit Kit parts for replacement after 2,000 hours operation
3000Hrs kit Kit parts for replacement after 3,000 hours operation
4000Hrs kit Kit parts for replacement after 4,000 hours operation

### Timely genuine parts order

## Online parts order (FRD-Net)

To meet the needs of the field, dealers can use FRD-Net Online Parts Order to check stock quantity of parts and to place an order of genuine parts in stock whenever needed.

Dealers will be notified automatically by e-mail of the shipping information of the parts having been ordered. You can check the delivery status in real time via your dealer by using the shipping document attached to the email.

Dealers can also order consumable kit parts online from the FRD-Net Campaign Parts page.

<sup>\*</sup> Consumable parts kits are subject to add, so please contact your FRD dealer.

### Benefits only for genuine parts users

#### Parts warranty

Genuine parts of FRD come with a warranty. Please contact your FRD dealer for warranty details.

#### Special support program

Extended warranty program for blast hole drills

FRD offers extended warranty program that allows you to extend the standard warranty period for main components. Rest assured by extending the warranty period for main components that incur high repair costs in the event of a breakdown.

• Full maintenance program for blast hole drills

Fixed monthly payment will provide you with the optimum maintenance program according to the operation. With the program, no cost for repair to the customer.

\* Please contact your FRD dealer for special support program details.
